- (d) Enact gender recognition systems concerning the rights of trans persons to change their name and gender markers on identification documents. The procedure involved should ensure due respect for free and informed choice and bodily autonomy. In particular, taking into account identified best practices, the processes should:
- (i) Be based on self-determination by the applicant;
  - (ii) Be a simple administrative process;
  - (iii) Be confidential;
  - (iv) Be based solely on the free and informed consent of the applicant without requirements such as medical and/or psychological or other certifications that could be unreasonable or pathologizing;
  - (v) Acknowledge and recognize non-binary identities, such as gender identities that are neither “man” nor “woman” and offer a multiplicity of gender marker options;
  - (vi) Be accessible and, to the extent possible, cost-free;
- (e) Examine seemingly neutral requirements that are prerequisites for change of name, legal sex or gender for potential or actual disproportionate effects in the light of the realities of the trans populations in each given context.
